

ABSTRACT OF THE DISCLOSURE

A color reproduction characteristic display  
apparatus displays a color chart. When a mouse cursor is  
5 placed on any one of a plurality of color patches  
constituting the color chart, there are displayed a  
coordinate value in a CMYK color space associated with the  
color patch designated by the mouse cursor and a color  
difference to determine two coordinates on a color space of  
10  $L^*a^*b^*$ , said two coordinates being associated with the  
coordinate value and two sorts of devices as well.
